Dear Dofasco Hiring Manager,

Please accept the accompanying resume for the position 'Summer Student - Library Resource Centre' that is posted on Dofasco career website. I am a self-motivated student who is enrolled in Software Engineering level 2 co-op program at McMaster University.

I have excellent skill in the region of programming. By that I mean I have confidence and interest in the work associate with C, Java and Python. I am also familiar with CAD with Inventor. Problem-solving is one of my strength in work and life and I develop creative solutions to problems. I consider myself a quick learner and I am open and willing to learn new knowledge to accomplish career related problems. I have done several engineering projects in school and by doing group projects I found myself adaptable at getting work done with others.

I have six-month work experience as a part time kitchen staff in Tea Hut Hamilton. By working in a high-pressure environment, I learned to work more efficiently and in an organized order. My time-management was also enhanced through the 20-hours-per-week job during school year.

I am open to all kind of jobs and especially to those which are programming associated. I am always looking forward to meeting with you and we can discuss the specific details.

Sincerely,

Sida Wang
